EDUCATION

Higher Secondary Education (Himachal Pradesh Board of School Education)

Overall Academic Performance: 88.54%

Graduated: 2026

Relevant Academic Interests

- **Explainable Artificial Intelligence (XAI)**
- **Healthcare Machine Learning**
- **Medical Information Technology**
- **Clinical Decision Support Systems**
- **Digital Health**
- **AI-assisted Nutrition Analysis**

FEATURED PROJECTS

NutriGuard AI

AI-powered Nutrition Analysis Platform for Diabetes Management

- **Developed an AI-powered healthcare platform that analyzes meal images to estimate nutritional values and evaluate glycemic impact.**
- **Integrated Google Gemini AI and Explainable AI concepts to generate transparent nutritional insights and healthier food recommendations.**
- **Designed an educational decision-support system to promote diabetes awareness and healthier dietary choices.**
- **Built using Python, Streamlit, Gemini AI, XGBoost, and Machine Learning techniques.**

Explainable AI Diabetes Risk Prediction

Interpretable Machine Learning for Clinical Decision Support

• Developed a diabetes risk prediction model using the PIMA Indian Diabetes Dataset.

• Applied XGBoost and SHAP to provide transparent feature-level explanations for trustworthy healthcare predictions.

• Focused on improving interpretability while maintaining reliable predictive performance for clinical decision support.

• Implemented using Python, XGBoost, SHAP, Pandas, NumPy, and Scikit-learn.

RESEARCH PUBLICATIONS

Explainable Artificial Intelligence for Diabetes Risk Prediction:

Enhancing Clinical Decision Support through Interpretable Machine Learning

Zenodo (2026)

DOI: https://doi.org/10.5281/zenodo.21514842

• Published research demonstrating the application of Explainable AI (XAI) and SHAP to improve transparency and trust in diabetes risk prediction models for clinical decision support.

NutriGuard AI:

An Explainable Artificial Intelligence Platform for Nutrition Analysis and Diabetes Management

Zenodo (2026)

DOI: https://doi.org/10.5281/zenodo.21534708

• Published research introducing NutriGuard AI, an AI-powered nutrition analysis platform that combines machine learning and explainable recommendations to support diabetes management.

TECHNICAL SKILLS

Programming

Python • SQL • HTML5 • CSS3

Artificial Intelligence & Machine Learning

Machine Learning • Explainable AI (XAI) • XGBoost • SHAP • Predictive Modeling

Healthcare AI

Medical Information Technology • Clinical Decision Support • Nutrition Analysis • Diabetes Risk Prediction • Digital Health

Development & Deployment

Data Science

Pandas • NumPy • Matplotlib • Scikit-learn

CERTIFICATIONS

• Google AI Essentials — Google (Coursera)

• Healthcare AI — Coursera

• Python Programming

• SQL for Data Science

• Machine Learning

• Healthcare Informatics

• Prompt Engineering

• 70+ Verified Professional Certificates in Artificial Intelligence, Programming, Data Science, Healthcare AI, and Digital Technologies

RESEARCH & PROFESSIONAL ACHIEVEMENTS

• Published two healthcare AI research papers with citable DOI records on Zenodo.

• Developed NutriGuard AI, an AI-powered nutrition analysis platform for diabetes management using Explainable AI principles.

• Developed an Explainable AI Diabetes Risk Prediction system using XGBoost and SHAP for transparent clinical decision support.

• Earned 70+ verified professional certifications in Artificial Intelligence, Programming, Data Science, and Healthcare AI.

• Built and deployed open-source healthcare AI projects using Python, Streamlit, Machine Learning, and GitHub.

LANGUAGES

• English — Professional Working Proficiency

• Hindi — Native Proficiency

• Korean — Elementary Proficiency (TOPIK II Preparation)
